

KR600

Newspaper Inserter

Handles full size broad sheets down to 4 page wraps.

The all-new KR600 Newspaper Inserting System offers a wide array of features and capabilities that increase reliability and throughput. Utilizing the latest PLC controls and innovative mechanical systems, the KR 600 has all the makings of a high-end system except the price.

The KR600 handles most insert types using a combination of interchangeable rotary and shuttle feeders. Both systems are available with KR's new DFD Drive System. This option provides "on the fly" control of insert delivery resulting in more consistent inserting and higher throughput.

The PLC based control system monitors package integrity and simplifies setup. New features such as pocket priority and backup ensure critical inserts never miss. The KR600 can also be equipped with a PC interface for zoning applications and is ideally suited for applications that require frequent and rapid changeover.

Insert
reliability into
your operation
and save a bundle
while you're at it
with the
KR600!

**Gaurds may have been removed for clarity.
Do not operate machine without gaurds in place.

KR600

Newspaper Inserter

** General Specifications

Physical	English	Metric
Length	14.3-29" (based on model)	363.22 -736.6 mm
Width	54"	1371.6 mm
Height	55"	1397 mm

Electrical Requirements

Voltage	Phase	Hz
220	1	60

Compressed Air Requirements

Minimum Pressure	90 psi
Usage	1/2 CFM/Station

Production Rate

Minimum Cycle Speed	10,000/hour
---------------------	-------------

Material Handling	Width	Length
Jacket Minimum	6"	6"
Jacket Maximum	17"	14"
Insert Minimum	3"	5"
Insert Maximum	17"	14"
Stock Thickness Min	Single Sheet	
Stock Thickness Max	.625"	

Options

- DFD Drive system
- Divert
- Inline inkjet
- Stacker
- Rotary vacuum pump

A user-friendly operator interface simplifies training and setup.

Rotary feeders are known for their ease of use, quick changeover and reliability. The KR694 is no exception.

Vacuum drawn through the KR600's flighted chain system keeps the jacket under control, even at higher line speeds.
