Powerful features that offer your business more flexibility and greater productivity

Designed to maximize ease of use, efficiency and accuracy, the DS-700 iQ from Quadient is the most flexible and scalable inserting platform available today. Best suited for organizations who perform high-volume mailings, the DS-700 iQ enables your business with a wide variety of job options to help you easily manage multiple short and large runs. Its modular design and output processing options means you can configure the equipment to meet the needs of your organization.

Envelope Feeder

The DS-700 iQ handles a wide range of envelopes from #10 to 10" X 13" and accepts completed insert collations up to 10mm thick. Adjustments for the completed collation size and opening of the envelope are all automated.

Output Processing

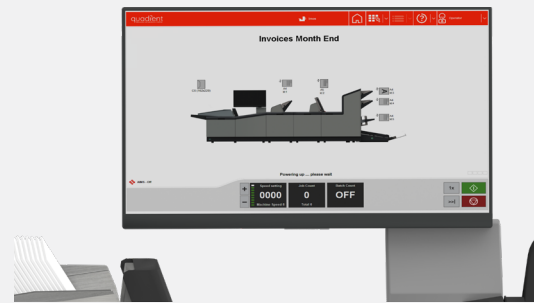

Choose from a large variety of output options including a simple conveyor, sorters, or postage meter choices. Personalize communications using a dynamic envelope printer providing the ability to print individual recipient details, return addresses, marketing slogans or permit indicia on your carrier envelopes. Design layouts and fonts, up to 600dpi, to suit each application for a truly unique mailpiece.

Intelligent inserting for today's diverse high-volume mailers

Wide-Screen User Interface

Control every aspect of the DS-700 iQ via its intuitive Touch-Screen using the latest-generation IMOS software. Folding, pack size and envelope adjustments are all made automatically. Once a job has been created using the step-by-step Wizard, it can be run at any time via the menu.

Feeder-Folder

The multi-functional Feeder Folder module eliminates the need to pre-fold enclosures. The Feeder-Folder supports Single, C and Z-folds, and pre-folded inserts as well. Full page reading is available as an option, supporting OMR, BCR, 2D or QR reading. The DS-700 iQ can support up to eight Feeder-Folders in-line.

Versatile Insert Feeders

The versatile Insert Feeder handles documents ranging from 80gsm (20lb) sheets to 6mm (1/4") booklets. The high-capacity feeder holds up to 10" of materials and can be reloaded on-the-fly for maximum efficiency. The optional full-page scanner can read OMR, BCR, 2D and QR codes and may be used for either matching personalized inserts with a prime document from the Tower Feeder Folder, or as the prime document for invoice or report applications.

Tower Feeder Folders

Tower Feeder Folders are available in five variations to meet your business needs, with document accumulation speeds of up to 14,000 documents per hour. The size and number of feeders are customizable based on customer requirements. Towers can be equipped with optional full-page scanners that read OMR, BCR, 2D or QR codes.

Documents may be loaded portrait style for folding, or landscape for larger flat envelopes. Three fully-automated fold plates adjust to the selected envelope size using C, Z, half or double-parallel fold patterns. Flat size envelopes can accept up to 80 sheets. To minimize idle time, a restart button on the Tower Feeder Folder may be used after refilling materials or changing jobs.

Boost document integrity and security with intelligent features

Make physical mail more targeted, more personalized and more valuable. Combine with Quadient Output Management and Mailroom Management software packages to ensure the quality and integrity of all outgoing mail.

Automate document preparation

Quadient Impress enables you to program business rules to enhance document formatting including, sorting, grouping, and personalization to ensure each communication goes into the right envelope.

Ensure compliance and security

AIMS (Automated Insertion Management System) offers the highest level of document security and integrity to ensure that every mailpiece is completed correctly. Its closed-loop verification process provides total peace of mind to organizations that handle confidential information and must maintain privacy requirements. AIMS also offers a wide range of real-time and historical trend reporting functions.

Specifications
